

# Cattle Station Manager

A station manager is required for a commercial cattle operation in the Alice Springs district in the Northern Territory. The 202,200 ha station carries approximately 6,000 cattle and leases a further 223,600 ha that is being progressively developed to increase the herd to approximately 10,000 head.

Reporting to the Directors, this position is for an immediate start and requires the successful applicant to have a strong commercial background and to be experienced in;

- Managing a large cattle breeding enterprise
- Formulating and operating to a budget
- All facets of station maintenance including, windmill and bore maintenance, mono pumps, solar and submersible pumping units
- Welding and carrying out fencing and yard maintenance
- Operating and maintaining machinery
- Possess very clear and concise communication skills (both written and verbal)
- Excellent supervisory/leadership skills with the ability to motivate employees/trainees whilst leading by examples
- Current unrestricted driver's license essential
- Licenses for NT firearms and vermin control would also be an advantage.

A 3 year employment offer with an attractive salary package will be negotiated depending on experience.
