

Assistant Farming Manager

Our Client

Our client is a major farm enterprise of 5,500ha in northern Victoria that produces summer and winter crops with a significant amount of drip and flood irrigation. Typical summer crops include tomatoes, corn, soybeans and some irrigated lucerne. Winter crops include wheat, oilseeds, chick peas and Faba Beans. They are now searching for a Assistant Farming Manager for their winter and summer dryland crops.

Role

The Assistant Farming Manager role will work across a diversified range of irrigated and dryland crops, with both summer and winter crop rotations. This is a fantastic opportunity for a young farming professional to take the next step in their career. Because of the diversified cropping program, it offers outstanding learning and training opportunities.

Requirements

The person for this role will have the following key attributes:

- Sound knowledge and competent skills in all aspects of summer and winter crop production
- Large farm management/intensive farming experience
- Farming technology background
- Some irrigation experience, preferably drip
- Broad machinery experience
- Attention to detail
- Tertiary qualifications are preferred but not essential
- Be part of a team of 8-10 staff involved in the farming operation
- Good general farm skills

Location

The farm is located in northern Victoria, near Boort/Minmindie. Boort is located on Lake Boort, a water wonderland for those who love boating, water skiing, canoeing, sailing, fishing and bird watching. Located just 250km northwest of Melbourne and 100km from Bendigo, Boort is the Jewel of the Loddon region with many attractions. There is also a major new High School located at Boort, ideal for young families.

Remuneration

An outstanding remuneration package is on offer to attract the right person for this role, including the option of either on-farm accommodation with swimming pool or a 4BR house overlooking Lake Boort.

To Apply
